MBA RAPID REVISION

Lecture - 01

Revision Class - 1

Arrangements & Distribution & Puzzles

By- GOURAV GUPTA

TOPICS *to be covered*

1) Rapid Revision

Set-1

Eight tyros Q, U, E, S, T, I, O and N who have to attend the MBA counseling in the months of, September, October, November and December. In each month, the MBA counseling will be conducted on either 20th or 28th of the month. No more than two of them have a MBA Counseling on the same month.

1. O attended the counseling on either 20th of November or 20th of September.
2. N attends the counseling before the date on which I attend the counseling.
3. There are four tyros attend the counseling between the O and S.
4. There is one tyro attend the counseling between S and U.
5. There are four tyros attend the counseling between U and T.
6. There are three tyros attend the counseling between T and Q.
7. There is one tyro attending the counseling between E and T.
8. N does not attend the counseling in the month of November.

QUESTIONS

#Q-1. Who among following attends the MBA counseling on 28th of September?

- A. U B. T C. O ☒ D. N

#Q-2. How many tyro (s) attend(s) the counseling between I and S?

- ☒ A. One B. Three C. Five D. Two

#Q-3. S attends the counseling on which date and month?

- A. 20th December B. 28th October ☒ C. 28th November D. 20th October

#Q-4. How many tyro (s) attend the counseling between I and O?

- A. Four B. Three C. Five ☒ D. Two

(5-6 min)

A showroom is open on all seven days of the week throughout the year. There are five employees Alex, Bhabha, Cathy, Dilip and Ethan who work in the showroom. Every day except Sunday, two employees are required while on Sunday three employees need to work. Every employee works for three days in a week. Some additional information is also provided:

- Every employee works on two consecutive days while the third day is not consecutive.
- Alex and Dilip work together on Tuesday and Wednesday while the other working day differs for them.
- Neither Bhabha nor Cathy works with Alex on any day.
- Cathy does not work either on Saturday or on Monday.

QUESTIONS

#Q-1. Number of days Bhabha and Cathy work together in a week is

- A. 0 B. 1 C. 3 ✓ D. 2

#Q-2. Which among the following employees do not work together on any of the days?

- ~~A. Bhabha and Dilip~~ ~~B. Bhabha and Ethan~~ ~~C. Cathy and Dilip~~ ✓ D. Dilip and Ethan

#Q-3. One of the days Alex works on is

- A. Monday B. Friday C. Sunday ✓ D. Saturday

#Q-4. The consecutive days on which Ethan works are

- A. Thursday and Friday B. Saturday and Sunday
✓ C. Friday and Saturday D. Sunday and Monday

#Q-5. Employees who work on Sunday are

- ✓ A. Bhabha, Cathy and Dilip B. Bhabha, Cathy and Ethan
C. Alex, Dilip and Ethan D. Cathy, Dilip and Ethan

QUESTION – 1 :

#Q. Number of days Bhabha and Cathy work together in a week is

- A. 0
- B. 1
- C. 3
- D. 2

QUESTION – 2 :

#Q. Which among the following employees do not work together on any of the days?

- A. Bhabha and Dilip
- B. Bhabha and Ethan
- C. Cathy and Dilip
- D. Dilip and Ethan

QUESTION – 3 :

#Q. One of the days Alex works on is

- A. Monday
- B. Friday
- C. Sunday
- D. Saturday

QUESTION – 4 :

#Q. The consecutive days on which Ethan works are

- A. Thursday and Friday
- B. Saturday and Sunday
- C. Friday and Saturday
- D. Sunday and Monday

QUESTION – 5 :

#Q. Employees who work on Sunday are

- A. Bhabha, Cathy and Dilip
- B. Bhabha, Cathy and Ethan
- C. Alex, Dilip and Ethan
- D. Cathy, Dilip and Ethan

Set-3

Directions

LOD → G-7/10

G-7 min

In an election there were five constituencies S1, S2, S3, S4 and S5 with 20 voters each all of whom voted.

100

Three parties A, B and C contested the elections.

The party that gets maximum number of votes in a constituency wins that seat.

In every constituency there was a clear winner.

The following additional information is available:

- Total number of votes obtained by A and B across all constituencies are 49 and 35 respectively
- S2 and S3 were won by C while A won only S1.
- Number of votes obtained by B in S1, S2, S3, S4 and S5 are distinct natural numbers in increasing order.

	S1	S2	S3	S4	S5
A					
B					
C					

QUESTIONS

#Q-1. The constituency in which B got lower number of votes compared to A and C is

- A. S4 B. S1 C. S3 ☒ D. S2

#Q-2. The number of votes obtained by B in S2 is

- ☒ A. 5 B. 7 C. 4 D. 6

#Q-3. Assume that A and C had formed an alliance and any voter who voted for either A or C would have voted for this alliance. Then the number of seats this alliance would have won is

- ☒ A. 3 B. 4 C. 5 D. 2

#Q-4. The number of votes obtained by A is S5 is

- A. 7 B. 9 C. 6 ☒ D. 8

#Q-5. Comparing the number votes obtained by A across different constituencies, the lowest number of votes were in constituency

- A. S2 B. S5 ☒ C. S3 D. S4

Analysis

	S1	S2	S3	S4	S5	Total
A	19	7	6	9	8	49
B	1	5	6	11	12	35
C	0	8	8	0	0	16
Total	20	20	20	20	20	100
Winner	A	C	C	B	B	

A | 7 6 5
 B | 5 6 7
 C | 8

12. 11
